LUNCH PROGRAM UPDATE

Dear Parents,

We ask that you continue to provide a sack lunch for your child. We continue to research other excellent school hot lunch programs in the San Diego area.

We will keep you updated and inform you of any decision that is made regarding the lunch program.

We recognize that there has been some difficulty in the billing process with Ranch Events. Please continue to be in touch with Ranch Events directly to resolve billing issues. Ranch Events can be reached at (858) 492-9100.

RE-REGISTRATION BEGINS!

Dear Parents,

We are already beginning the important planning for the 2011-2012 school year! We will be mailing the 2011-2012 school year Re-registration Forms soon. Please check your mailboxes the week of January 24th and be sure to return your forms along with registration fees to Sandy Martinez by February 28th. Also, please make sure that your tuition accounts are up-to-date. You will not be able to re-register if your tuition is not current. Spaces are limited, so re-enrolling your child as soon as possible is very important. If you have any questions, please feel free to contact me sandy@saint-johns.org.

If someone forwarded the school e-news to you and you wish to receive future mailings, please click the button and add your information.

NEW VACCINATION REQUIREMENTS FOR WHOPPING COUGH

A new law requiring Middle and High School students to be vaccinated against whooping cough will go into effect July 1st for the 2011-2012 School Year. All students entering 7th -12 grade, in both public and private school will be required to show proof that they have had the Tdap vaccine before they can start school. Schools have been informed there will be no grace period and that they should strictly enforce this requirement.

In San Diego County, two infants died from complications resulting from whooping cough. Confirmed whooping cough cases reached a total of 1,106 by the end of 2010. The number of cases in 2010 nearly tripled the previous record of 271 cases in 2005. Parents can get the vaccine from their primary health physician.

A typical case of pertussis in children and adults starts with a cough and runny nose for one-to-two weeks, followed by weeks to months of rapid coughing fits that sometimes end with a whooping sound. Fever if present, is usually mild. The disease is treatable with antibiotics.

You will receive a letter from Mrs. Love concerning this new law. For additional information, visit the California Department of Public Health, Immunization Branch website at <http://www.getimmunizedca.org>
